To Whom It May Concern:

I would like to express my recommendations regarding Debra Thiesen as a health care practitioner, an individual and employee.

Ms. Thiesen is a gift to all those she works with as she is clear about her tasks, purpose, role, and limitations. She is clear in her communications and she is very heartfelt for selfless reasons as she attempts all her aspirations. She is efficient. Her experience goes beyond one's expectations and she has sound input for those who work with her when she is asked to participate in planning, team-building, goal-setting etc. She executes well her tasks. She anticipates well her achievements. She is punctual, prepared, and has good foresight.

As for her skills in her health-care applications she far exceeds one's expectations and is a contribution to any team or individual she may be assisting in their journey to health. Gifted is the word that best describes Ms. Thiesen in many aspects but specifically in her health-care applications as a massage therapist and body worker.

I can easily and whole-heartedly recommend Ms. Thiesen for her work and her contributions. We will miss her from our Team and wish her the best in all her endeavors.

Sincerely,

F. Blake Ambridge, DC, DACNB
Chiropractic Neurologist
Clinic Director

**note Debra Stone (formerly Debra J. Thiesen).
