Dear Horse Clients & their Folks!*

When the grass is greener promoting Colic in your Beloved Horse(s)...

We are experiencing such sucess with turning Colic around in Session with the horse and their folks near....blueprinting the Balance reveals most often, they are holding for their loved ones. Either family four leggeds and their favorite people or even those who have harmed them of the past.

We all Heal through time, Horses too... something present time triggers Us of the same vibration of response, to a younger time, when we had no choice for another's pain or trauma.
Now safe with their current person, as already my Client of embodied healing... gifts each horse a safe arena for their own healing.
Often after all details are revealed and documented 'blueprinted' from their Healer within of the who, what, when, where and often why. The Horse says to me, 'YES', it's time to return it now to who it belongs with all the love in the world intentionally, as I agreed to carry this burden so long ago. All symptoms, patterning of response and behaviors begin easing with their conscious choice of present time!*

In the application process of the Energy Balance, even my hand placements are guided within them. Then we keep connecting Overseeing Systems to organs, cells, glands, whatever is indicated, until their Energy Field for restored to Pristine Energy of themselves as very young horse!*

We see every time, how the stomach meridian starts running forward to present moment, instead of backwards to the past trauma in patterning of response and behavior that they cannot stomach any longer.
Once we have extracted the other's energy signature in their Field and restored their own....we all sense relief and a turning toward the Horse's own needs strenghtening.

In this detailed repair and restore process of their electrical system to every energy connection to before the Loyalty. We witness in Session in them and in ourselves.... their symptoms release and the body, mind & spirit of the horses strenghten & relax. They return to Ears forward, yawning, snorting....& pooping, like waking from a bad dream, their eyes soften, ever closer to Healer within from this experience for returning to their peaceful essential nature~

I'm privledged and honored to work with Lornie Forbes and her Beloved Horse Herd weekly for many years now. Her own work of Energy Balances before we go to the care of her horses...is courageously stunning and Collectively with her Horses is Over the Moon Amazing!* She has gifted Us here, her Testimonial.

I know the success of her Horse Herds members health challenges and many Colic situations healed, is because of Lornie's ambition to Heal old stories. She sets an outstanding couragous embodied experience, to gift her Horses permission to heal their trauma and pain of the past. Always, I am there Distantly following the Horses Energy Field's Healers' Wisdom.

Each Session is a growth sput for all, almost hard to believe in response toward Health with courage and willingness to be our authentic selves!* And of course, the sooner we know of the Colic, always on call... the better!*
Even when Horses are clearly in the dying process, when they hear their truth within voiced and applied ... they choose to live & thrive!

I highly recommend consulting Debra Stone (Turning Point Energy Restoration) for horses experiencing colic symptoms.

I have used Debra's service multiple times in horses with colic, with great success. One horse had symptoms of extremely high respiration while lying down in her stall. Debra worked remotely with me on the phone, and by the time the vet arrived, the mare's respiration was almost normal, and she was mostly out of pain. Two hours later she was outside, eating grass as normal.

When Debra works with a horse experiencing colic symptoms , she helps the horses resolve the energetic challenges they are facing. Once the challenges are resolved, the horse really is "out of the woods". I have had great success with resolution of colic symptoms , in 100% of horses Debra has worked on for me, and highly recommend her work.

There is a protocol for this emergency work~ Working with their person in Sessions more recently is essential!*
So if and when this emergency of life & death arises...they understand (and can often need their own connections in the emergency)...this full service to everyone's body speak of what is being revealed, translated in the blueprinting and applied to their Collective Energy Field of Horse and their Folks... physical bodies!*

Look forward to working with You and your Horse(s) toward these life transformations.

Blessedly So~
Debra
